

Institutional Distinctiveness

Organic Farming

Ramachandra College of Engineering in Eluru stands out as a trailblazer in fostering sustainable agricultural practices, particularly through its commitment to organic farming. This institutional distinctiveness has positioned the college as a leader in the integration of technology and environmental consciousness.

The implementation of organic farming in our college is a transformative initiative that aligns with our institution's commitment to sustainability and innovation. A model organic farm on campus serves as a living laboratory, providing practical experience and showcasing best practices in sustainable agriculture. Collaborative research initiatives engage faculty and students in developing innovative organic farming technologies. This farm showcases best practices in organic cultivation, featuring diverse crops grown without the use of chemical fertilizers or pesticides. The farm serves as a living laboratory, allowing students to apply theoretical knowledge in a hands-on setting.
