**Feed back from students:**

**“Diwali is a festival which celebrates togetherness. However, along with this goodness, there are a few not so good things which like air pollution, noise pollution and wastage of resources that can cause harm to the nature. This year, let us pledge to do our bit in saving our mother earth!”**

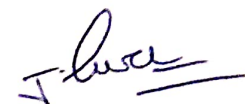

**ADDEPALLI MEGHANA DEVI**

**Electricity is an expensive commodity and the bill can cause a hole in your pocket. Try illuminating your home with diyas instead. Being traditional and organic, this is close to the spirit of Diwali and will also help the people whose livelihood depends on the business.”.**

**M.GOWRESH, EEE**

**Although bursting crackers should be completely avoided, it becomes difficult to convince the kids. The best thing to do in such a situation is to buy eco-friendly crackers. These are made of recycled paper and make less pollution”.**
