Report

1. Report in brief by Organizer / Coordinator / Convener:

Hardware and Networking is a vast field in India. It refers to the process of supplying data and information by linking the group of networks using hardware's such as switches, hubs, gateways, access points, network interface cards. To be more specific, hardware networking includes all peripheral, computers, interface cards and other tools required for communications and data processing in the network.

Computer hardware professionals take care of the maintenance of computer hardware, while networking involves connecting a group of 2 or more computer systems for sharing data information.
