### About the guest talk

- **Guest speakers** are fundamental in breaking down the barriers of the classroom walls to deepen learning. The experience gives students the opportunity to connect with professionals and create meaningful learning connections.
- A Guest Speaker can be a great tool for the improvement of a class, because it offers a new perspective and variety in the way it is taught, while it provides important specific subjects that are often omitted from a regular class.

- That in turn brings a better learning experience to the students, the teacher and even the guest speaker. Because of the way this technique is used, a better one-on-one approach is achieved, as well as a better understanding of a topic that otherwise would be very dull or unclear.
- Students have a chance to learn about said specific topic in a way that helps them get fully involved in the class and actively engage in a more approachable way of teaching.

### **About the resource person**

- Immediately after graduating in Civil Engineering, in First Class with Distinction, from Andhra University College of Engineering, Visakhapatnam in 1974, Major General Prof. Dr. Surya Subbavadhanulu Dasaka (Retd.) started his career with Bharat Gold Mines Ltd, Kolar Gold Fields, Karnataka, as a Management Trainee (Civil Engineering).
