Report

1. Report in brief by Organizer / Coordinator / Convener:

The Trainer addressed the students about Cyber Security refers to the act of protecting and ensuring the safety of computer systems and electronic devices from targeted cyber attacks, opportunist malware or accidental introduction of malware by users. The global scale of cyber threats continues to rise rapidly. In the modern day and age, access to volumes of data has gained currency, and hence every year numerous attempts are made to breach data or sensitive, confidential or classified records to expose information for political or economic gain.
