Report

1. Report in brief by Organizer / Coordinator / Convener:

Mr. Guru Prakash Addressed the students related to android application development. Mobile app development is rapidly growing. From retail, telecommunications and e-commerce to insurance, healthcare and government, organizations across industries must meet user expectations for real time, convenient ways to conduct transactions and access information. Today, mobile device and the mobile applications that unlock their value—are the most popular way for people and businesses to connect to the internet. To stay relevant, responsive and successful, organizations need to develop the mobile applications that their customers, partners and employees demand.

2. Photos:

3. Feedback from students:

Students are undergone through the interactive session and inspired them to think and programming with various methods for the develop of mobile applications.

4. Remarks from Resource Person:

He asked both students and faculty to practice these regularly for programming in mobile application. He also asked to continuously upgrade the new web based languages for better applications.
